PROJECT EXPERIENCE

- **Application development** -Netflix and Amazon Prime Video clones using Flutter which allows user to watch their favourite movies and shows
- **To Do Ap** – This To do App has the feature for users to add their tasks for the day with different category based on their Task. The user can create delete and review their task
- **YouTube clone using React**- Designed, Developed and maintained a YouTube clone using React, enabling users to watch, search, and review videos and channels. Proficient in JavaScript, React, Node.js, and SOAP/REST API services.
- **Spotify Clone**– Developed Spotify clone using React which has the feature of listening to the favourite audio and podcast which includes best user experience. Clearly document solutions that can then be used to support the test team.
- **Weather website**- using JavaScript which gives real time weather with good User Interface
- **Personal Portfolio website**- Which demonstrates my skills, knowledge, Experience, Education, projects and function to visit my GitHub repo and resume
- **Created consumer facing website** using JavaScript, HTML 5and CSS
- Designed a database to be used in hospital or other medical facility setting which included, 3NF relational Schema, ERD and Scripting using MySQL

Certifications

- Technical Support Fundamental by Google
- HTML, CSS AND GENERATIVE AI
- HTTP ESSENTIAL TRAINING
- SQL ESSENTIAL TRAINING
